Jl. Tengku Abdurrahman, Lrg. Melati, Kec. Lampoh Daya, Kab. Banda Aceh

Aidil is a sixth-semester student at the Informatics Department, Syiah Kuala University. He is interested in information technology, research, and education. Aidil is a person who respects opinions, pays attention to details, and is highly disciplined. Currently, he is exploring Software Engineering, with a strong passion for Web Development and Machine Learning.

EDUCATION

Syiah Kuala University

Bachelor in Informatics | GPA: 3.74 / 4

Banda Aceh

2023 – Present

PROJECT EXPERIENCE

AGRILINK

Full Stack Developer

June 2026

AgriLink is a web-based sustainable agriculture marketplace developed to connect local farmers directly with consumers through an integrated digital platform. The system aims to improve the efficiency of agricultural product distribution, enhance price transparency, and support sustainable farming practices. AgriLink accommodates two main user roles, farmers as sellers and general users as buyers, by providing product traceability, harvest information, location-based product discovery, and transaction management features. The platform was developed using Next.js, TypeScript, React, Tailwind CSS, Next.js API/Node.js, and PostgreSQL.

- Designed and developed a web-based marketplace system that enables farmers to manage stores, add agricultural products, update stock, and provide product information such as location, harvest date, and cultivation method.
- Implemented buyer-oriented features, including product search by category and location, product detail pages, order management, and transaction status tracking to support a more transparent purchasing process.
- Developed core sustainability features such as product traceability, food miles indicator, and freshness score to provide users with information regarding product origin, distribution distance, and estimated freshness level.

GEOTAGGING

Full Stack Developer

January 2026

Geotagging is a web-based geospatial disaster reporting system developed to support field-based documentation, spatial monitoring, and community-level disaster response. The project was aligned with a disaster-themed community service program and was inspired by recent infrastructure-related disaster issues in Aceh, where structured location-based reporting is needed to improve data accuracy, traceability, and response coordination. By integrating geotagged coordinates, photographic evidence, damage classification, and administrative verification, the system provides a centralized platform for documenting and monitoring disaster incidents through an interactive map interface.

- Developed a web-based geospatial reporting system using Next.js, TypeScript, Prisma, PostgreSQL, Leaflet, and React-Leaflet.
- Implemented GPS-based location capture, manual coordinate selection, reverse geocoding, and map-based disaster visualization to improve spatial accuracy.
- Built a disaster report submission workflow covering damaged object information, damage type, severity level, location details, and photographic documentation.
- Designed a verification and monitoring mechanism using report status, handling progress, and administrative review to support structured disaster response management.
- Connected the project with thematic disaster community service activities to strengthen field data collection, infrastructure damage documentation, and community-based disaster monitoring.

JAKSABANG

Front-end Developer

July 2025

JakSabang is a community-based tourism platform developed to support the digital transformation of tourism services in Sabang. The platform integrates accommodation, transportation, and local guide bookings into one digital ecosystem, empowering local MSMEs through sustainable marine tourism. The project applied the Agile development methodology, with emphasis on creating a responsive and user-friendly interface that enhances user experience across devices.

- Designed and developed the website’s front-end interface using React.js, focusing on visual consistency, responsive layout, and interactive user experience.
- Created an intuitive UI design with an engaging landing page, marketplace interface, and destination pages optimized for both desktop and mobile users.
- Collaborated with the back-end team to integrate the AI Chatbot, marketplace features, and payment gateway (Midtrans) into the front-end framework.
- Improved user experience through iterative usability testing and design refinement based on user feedback.
- Contributed to achieving high performance metrics, including a 91 SEO score and 100 desktop performance, ensuring smooth and accessible user interaction.

ORGANIZATIONAL EXPERIENCE

HMIF USK

Banda Aceh

Member of Social and Community Department

February 2025 – January 2026

The Social and Community Department of HMIF USK is responsible for managing social initiatives and community service programs aimed at strengthening the bond between informatics students and the surrounding society. The department focuses on fostering empathy, teamwork, and social awareness through various projects and volunteering activities.

- Organized the annual community service program “Takjil on The Road” as Head of Committee, coordinating over 40 volunteers to distribute free iftar meals to the public during Ramadan.
- Promoted a culture of empathy and social responsibility among HMIF members through continuous engagement and post-event reflection sessions.

DPM FMIPA USK

Banda Aceh

Member of Commission I (Aspiration Commission)

January 2025 – January 2026

The Aspiration Commission (Commission I) of DPM FMIPA serves as a bridge between students and faculty, focusing on collecting, analyzing, and addressing student aspirations and concerns. The role emphasizes communication, advocacy, and transparency to improve academic and organizational welfare within the faculty.

- Collected and evaluated student aspirations related to academic and organizational issues within FMIPA USK.
- Facilitated discussion forums between student representatives and faculty officials to deliver and follow up on student feedback.
